

Solution Assurance for Nexus CM

Get prepared for your PKI solution based on Nexus Certificate Manager

PROFESSIONAL SERVICES

The service "Solution Assurance for Nexus Certificate Manager" from Nexus Professional Services will give you a documented preparation for a full deployment of your Nexus Certificate Manager based Public Key Infrastructure (PKI) solution.

Service description

Duration:

1 Week

Target group:

Customers on Nexus Certificate Manager.

Expected result:

Documented preparation for a PKI solution or full deployment of Nexus Certificate Manager.

Detailed content:

1. All requirements are identified and documented. Requirements includes functional, non-functional (e.g. performance), technical (e.g. technical platforms) and support.
2. A technical analysis of the requirements is conducted.
3. A high level architecture is developed, including all required system interfaces. Important design decisions are documented and motivated.
4. The target production environment is identified and verified. The impact on the production environment is described.
5. A risk analysis is conducted on the implementation. Measures on how to reduce these risks are described.
6. The implementation project is estimated in terms of costs and duration.
7. The Solution Assurance is documented in a report.
